#### About Dr. Boulet

Developmental Optometry Practitioner. Dr. Boulet's background is in neural science and neuropsychology, education, information technology, and he holds a doctorate in developmental optometry from Pacific University, Oregon. His experience includes work with curriculum and instructional design, and he has developed an extensive online library of technical and research resources, as well as training and activities for parents and therapists working with young learners. He is an author and researcher and trains child development specialists to detect and work with vision related concerns in school-aged children.

#### General Services

Dr. Boulet is a licensed Alberta Optometrist and is a primary care doctor for diagnosis and treatment of eye disease and visual disturbances. This

includes management of surgical needs for things like cataract, diabetes, glaucoma, LASIK/PRK, and others. Dr. Boulet is well positioned to service clients' general and specific eye health and vision concerns. As a practitioner interested in child vision needs, he is especially happy to meet new young clients and their parents. A reminder to all parents that ALL children need to have vision exams early, by 12 months of age, then at least each 2 years afterwards. Most services are covered by Alberta Health Care.

#### Specialized Services in Learning and Vision Assessment and Therapy

1. Diagnosis of vision-related learning and reading concerns.
2. Consultation for infant and child strabismus (eye turns) and amblyopia (so-called 'lazy eye').
3. Treatment plans for children with behavioural and developmental concerns in the classroom.
4. Help with acquired and traumatic brain injury.
5. Public and professional education and training.
6. Consultations to schools regarding vision management and optimization of the learning environment.

There are fees for consultation and report writing. Please contact the office for current rates.
